

LEGACY RESEARCH
G R O U P

THE COMPLETE GUIDE TO
LEGACY
RESEARCH
GROUP

Legacy Research Group is one of the largest independent publishing companies in the world, with two million readers in over 140 countries.

WELCOME!

And congratulations!

You've made a smart decision to partner with Legacy Research Group.

For your convenience, we've created a collection of helpful tools to guide you... starting with this catalog. Consider it your Legacy Research handbook. In the pages that follow, we present all of our Legacy Research experts – who they are... what they specialize in... what publications they write... And they're all organized alphabetically and by business.

So flip through this catalog of Legacy experts... find the ones you already follow... meet the ones you don't know yet... and see everything your new Legacy Research subscription has to offer.

And when you're done with that, make sure you check out [this helpful table](#). It gives you everything you need to know about all our letters in one easy-to-follow grid.

Regards,

Kris Sayce
Editor-In-Chief

P.S. We also send a Weekly Wrap Up email to Legacy Research lifetime subscribers at the start of every week. It'll help guide you through everything we publish each week. So be sure to check your inbox for that on Monday afternoons.

ABOUT US

R LEGACY RESEARCH GROUP

From the beginning, independence has been the key to Legacy Research's success. Unlike the mainstream press, we don't make our money from corporate advertisers. And unlike Wall Street, we don't take commissions or fees from the companies we cover in our newsletters.

Instead, we sell ideas, opinions, and recommendations.

What you see is what you get. There's no more to it. Our mission is to provide readers with a broad view of the world. So, we ask questions. We research and test. But we do not claim to have the last word on every issue. We explore ideas with our readers... so they can decide for themselves.

That means we don't have a one-size-fits-all approach to finance and investing. Each publisher under the Legacy umbrella has its own unique culture and outlook... Just like each of our readers has his or her own personal investing style.

Bullish or bearish... Conservative or speculative... Stocks, options, or cryptos... The common thread is great ideas.

CHRIS LOWE

Chris Lowe has been working as an analyst with Bill Bonner's financial publishing firm, The Agora, since 2007. He is currently Legacy Research's editor-at-large.

Chris heads up *The Daily Cut*, Legacy Research's first daily e-letter, as well as our premium weekly e-letter, *Inner Circle*.

His mission is to keep you up to date with the latest ideas, insights, and recommendations from the Legacy team of analysts. He also frequently sits down to interview outside investors and big-picture thinkers.

Over the years, he's interviewed Marc Faber, Jim Rickards, Rick Rule, Frank Holmes, David Stockman, and Alan Greenspan... as well as dozens of other fund managers, economists, and market analysts.

After graduating from Trinity College Dublin, Chris trained as a business analyst in London for international news agency Reuters, where one of his first assignments was looking into the Enron financial fraud. He then worked as an investigative reporter in his native Dublin, where he covered Ireland's "Celtic Tiger" real estate bubble.

CHRIS LOWE'S PUBLICATIONS

Inner Circle gives you access to a group of experienced, intelligent, and outspoken investment experts. Many of these experts are based here in the U.S. But we also have teams in London, Paris, Bonn, Madrid, Beijing, Buenos Aires, and elsewhere. From high-yield investments to emerging markets, to aggressive resource and commodity plays... our people are on the ground, examining them firsthand and finding the best opportunities, wherever they are. Every week, editor Chris Lowe reads each report, research note, and recommendation produced by Legacy's global council of experts. He then compiles the best information in an easy-to-read memo so you'll have only the very top ideas direct to your inbox.

KRIS SAYCE'S PUBLICATIONS

The Daily Cut

The Daily Cut is the only place you'll find all the top ideas, insights, and investment opportunities from insiders Teeka Tiwari and Nomi Prins, master trader Jeff Clark, and their "brain trust" of analysts. For almost four decades, the founders of Rogue Economics, Palm Beach Research Group, and Brownstone Research have been responsible for sending you independent financial analysis and recommendations from award-winning investors, traders who've managed millions of dollars, PhDs, advisors to the president and the CIA, and best-selling authors. *The Daily Cut* is the culmination of all that experience.

KRIS SAYCE

Kris Sayce's career started in the financial markets more than 25 years ago in London, where he specialized in small-cap stocks listed on London's Alternative Investment Market (AIM).

He discovered financial newsletters in 2005 and headed up several, including *Daily Reckoning*, *Revolutionary Tech Investor*, and *New Frontier Investor*.

His biggest calls include telling investors to buy tech stocks in the early stages of the boom in 2013, and correctly predicting the Chinese stock market boom in 2014/2015.

Now, Kris writes the *The Daily Cut*, showing investors how to grow their wealth during the next stage of the economic cycle.

ABOUT US

Brownstone Research is a boutique investment research firm that consistently delivers insights and profitable investment recommendations to its subscribers.

For too long, the best investment research has not been available to individual investors. It has been typically reserved for investment banks, hedge funds, private equity, and high-net-worth clients.

Brownstone Research focuses on large-capitalization technology companies that are still in growth mode and deliver outsized returns. Additionally, the firm publishes highly specialized, alpha-driven investment research, with focuses on small- and micro-capitalization technology companies on the bleeding edge, as well as on early stage, pre-revenue biotechnology companies developing novel approaches to curing human disease. Brownstone Research also covers the unique space of special purpose acquisition corporations, more commonly known as SPACs. And finally, it tackles the growing world of opportunity within blockchain technology and crypto assets.

The mission of Brownstone Research is to make a wide range of proprietary research available to any investors looking to gain an edge in the markets. The goal is simple... to deliver unique and profitable investment research found nowhere else.

COLIN TEDARDS

Born and raised just 1 hour east of the Silicon Valley in California, Colin made his first \$1,000 investment in 1999. He went on to study business at California State University, Stanislaus with a focus on Economics and Business Management. After college, he opened a small retail store in 2006. Just 2 years later during the great financial he lost it all. Colin then taught himself how to code and spent the next several years building and selling numerous successful websites. During the stock market crash of 2008/09 Colin made several key investments in the stock market. In 2016 he was able to sell the shares he bought during the market crash to buy a house in California with his wife Annie.

In 2014, Colin started writing as an analyst for the financial website Seeking Alpha. Focusing primarily on micro-cap companies early on, Colin made notable calls on Full House Resorts, LogicMark, The Joint, and Upland Software. In 2023 Colin's buy ratings of Microsoft, Google, Amazon and Getty Images have returned market beating returns. In 2016, Colin started publishing investment videos, reaching over 10 million viewers worldwide. In 2022 Colin was quick to identify the market correction and just weeks before the October 2022 lows suggested his viewers resume buying stocks again.

COLIN TEDARD'S PUBLICATIONS

THE BLEEDING EDGE

The Bleeding Edge is the only free newsletter that features investing insights from editor Colin Tedards. Here, Colin will share what he's watching in the market and which stocks you'll want on your radar.

THE NEAR FUTURE REPORT

The Near Future Report is a large-cap technology investment advisory focusing on industry-altering trends right around the corner.

Exponential Tech Investor

Exponential Tech Investor is a small- and micro-cap technology investment service specializing in cutting-edge technology on the verge of exponential growth.

DAY ONE INVESTOR

Day One Investor is a research service focused on bringing private investments to regular investors. Here, subscribers will learn about the very best opportunities to invest in Reg CF and Reg A/A+ private deals.

WEB3 DYNASTY

Web3 Dynasty is a research service focused on the blockchain and cryptocurrency space. Here, investors will learn about the very best opportunities to invest in stocks, cryptos, platforms, and projects in this budding field.

BROWNSTONE UNLIMITED

Brownstone Unlimited offers the highest and most exclusive level of membership. Members will receive lifetime access to all of its current and future publications. *Unlimited* members will also be the first to hear about exciting new announcements happening with Brownstone Research.

ABOUT US

At Rogue Economics, we believe financial independence is the most important step in the path to personal freedom.

Our global team cuts through the mainstream double-talk to show you where average investors are making big mistakes. And, through our various investment newsletters, we help you protect and grow your wealth with time-tested strategies.

You'll find insights from best-selling financial author and former Wall Street insider Nomi Prins, and her team of international analysts...

Every day, we look behind the curtain of Wall Street and Big Government to show you how the financial world really works. We expose the dangers to your wealth that others ignore or overlook. And we highlight the biggest opportunities to profit from disruptions in the markets.

No matter which path you choose at Rogue Economics, you can always expect unique ideas from big thinkers in our pages.

NOMI PRINS

Nomi Prins is the editor of Rogue Economics' flagship service, *Distortion Report*. In her daily e-letter, *Inside Wall Street with Nomi Prins*, she shines a light on the collusion that happens between Wall Street and Big Government behind closed doors. And, in her paid advisories, she provides actionable recommendations to help readers profit from the distortions this creates in the markets. As a lifelong learner, Nomi encourages others to do their own research, ask big questions, and think for themselves. She uses her knowledge of Wall Street and government to demystify the world of money.

Before becoming a renowned journalist, public speaker, and best-selling author, Nomi reached the upper echelons of the financial world. She worked as a managing director at Goldman Sachs, ran the international analytics group as a senior managing director at Bear Stearns in London, was a strategist at Lehman Brothers and an analyst at the Chase Manhattan Bank. Nomi grew discouraged by the unethical practices that permeated the banking industry. She became an investigative journalist to shed light on the ways financial systems are manipulated to serve the interests of an elite few at the expense of everyone else. Today, she brings those insights to Rogue Economics.

NOMI PRINS' PUBLICATIONS

INSIDE WALL STREET

WITH NOMI PRINS

Every day, Nomi and her team of global experts provide you with insights about the epic disconnect between the markets and the real economy. And they uncover unique investment opportunities to help you take advantage of it.

DISTORTION REPORT

Nomi brings you actionable investment recommendations, so you can take full advantage of this paradigm shift. She and her global team monitor the exclusive *Distortion Report* model portfolio, and provide alerts along the way when it's time to take profits or reduce exposure.

ENERGY DISTORTION MONITOR

Nomi has identified the biggest profit opportunities unfolding in the energy markets in the next 12-24 months. And at *Energy Distortion Monitor*, she provides a "done for you" model portfolio, to help guide her readers through this massive distortion.

THE **GOLD RUSH** PORTFOLIO

Every time the elites changed the rules to preserve their own power, gold rushed higher. It happened in 1913, 1933, and 1971. Today, it's set to happen again. At *The Gold Rush Portfolio*, our mission is to help readers "front-run" the next gold rush.

PHIL ANDERSON

Imagine you could see – with clarity – what will happen in the U.S. housing, stock, and commodity markets over the next few years.

You'd know exactly the right time to buy a house, apartment, or investment property. You'd know the ideal time to profit from a stock market sell-off, and you'd have the confidence to invest in assets when most people are running scared. Well, now you can. Phil Anderson is a legendary economic forecaster, and the world's foremost authority in business, real estate, and commodity cycles.

Few economists can traverse across stocks, bonds, and real estate like Phil can. With his 34-plus years of experience in forecasting markets, graphs and chart analysis covering everything from hemlines (believe it or not), to skyscrapers, he has kept audiences in a state of economic intrigue over the last decade. And best of all, he's kept his readers calm and confident over every single market turn over the last 30 years. He's truly the north star among the noise of the markets.

As editor of *Cycles Trading with Phil Anderson* and *The Signal* at Rogue Economics, Phil Anderson brings his wealth of knowledge to a U.S.-based audience for the first time.

PHIL ANDERSON'S PUBLICATIONS

CYCLES TRADING

WITH PHIL ANDERSON

Cycles Trading with Phil Anderson is a free, three-times-per-week newsletter. Phil's goal with this letter is to help you "see the cycle" – that is, his 18.6-year real estate cycle, - and its constant relationship to the markets. Once you start to understand that the world moves in cycles, you can forecast market moves, ignore the mainstream media's frantic prattle, and build wealth.

The Signal

The Signal is legendary economic forecaster Phil Anderson's elite product in which he demystifies the stock markets... connects the dots on how the stock market always tells us what to do using his 18.6-year real estate cycle... and positions his readers to grow their wealth by using his "right stocks, right time" system, paired with 30+ years of experience in chart analysis.

JOHN PANGERE'S PUBLICATIONS

ROGUE STRATEGIC TRADER

There's a war being waged against your financial future. Market crashes, inflation, deflation, high-speed supercomputers, and Wall Street insiders are trying to get between you and your money every day. But John Pangere sees serious opportunity in the years ahead. An era where strategic traders will make a killing. The era of "easy money" is over. And it's more important than ever to be selective in your investments. You need to have a true game plan – and multiple ways to profit. Passive investors will get crushed, but Strategic Traders will thrive. And with our proven system, we'll come out on top no matter what happens in the markets.

JOHN PANGERE

John Pangere is a former investment banker, where he worked on late-stage venture deals and with early stage startups, raising tens of millions of dollars for companies like Twitter and Bloom Energy before they went public.

John has successfully traded currencies, futures, options, and invested in stocks and real estate for years.

But he didn't start out in finance. He has an engineering degree from Purdue University and managed multimillion-dollar construction projects at his family's business before switching to finance. He's worked on *Strategic Trader* since it launched, earning his subscribers gains of up to 2,000%.

CHRIS WEBER

Chris Weber may just be the most successful investor you've ever heard of. He started investing in 1971 when he was just 16 years old... turning \$600 from his paper route into \$1.8 million in cash within a decade through a series of remarkably insightful investments... including buying gold coins when the U.S. got off the gold standard.

By the time he was 18 and out of high school, Chris Weber was independently wealthy. He's lived all over the world and retired at 40 years old. He prides himself on never having had to work a normal job – ever. He started writing for the Oxford Club in 1993. He took over *Inside Biotech*, the newsletter that turned into *The Weber Global Opportunities Report* on May 1, 2002. Today, that newsletter is *The Weber Report*.

In this twice-monthly letter, Chris writes about his latest thoughts on what's happening in the markets... his views on stocks, the dollar, gold, and any other issues relevant to your profits and future wealth... the latest investments he thinks you need to be in today... and a summary and overview of his current portfolio of investments.

He's written or coauthored eight books on economics and investing, including the best-selling *Getting Rich Outside the Dollar*.

CHRIS WEBER'S PUBLICATIONS

THE WEBER REPORT

The *Weber Report* is Chris Weber's twice-monthly newsletter in which he aims to use his global perspective - earned from living a life abroad, and extensive travel - to create and preserve prosperity and wealth for his readers. He focuses on meticulous risk management, the bond market, currencies, the U.S. dollar, and stocks. He believes timing is everything in the markets.

ABOUT US

PALM BEACH RESEARCH GROUP

The Palm Beach Research Group is a publishing company unlike any other. Most financial advisories are little more than stock “tip sheets.”

But we don’t limit our ideas to just stocks and bonds. We also research options, real estate, private equity, and alternative assets like gold and cryptocurrencies. Because we know there’s a place for all these in a well-balanced and successful portfolio.

And unlike Wall Street, we don’t need to place outsized bets to try and get mediocre returns.

Instead, we recommend doing it the other way around: Making relatively small bets on investments that can deliver life-changing gains. We do this by using what we call “asymmetric” risk investing.

We put our subscribers in the position to harness the effects of positive asymmetric risk. With positive asymmetric risk, you can put up \$100... and could stand to make \$100,000 – or more.

This approach gives you the opportunity to turn tiny grubstakes into life-changing gains without putting your current lifestyle at risk.

This is the secret behind getting really rich, really quickly, without ever blowing yourself up.

And it’s the key we follow at Palm Beach Research Group to help you move the needle on your personal wealth, regardless of what the market does.

TEEKA TIWARI

Teeka Tiwari is the editor of Palm Beach Research Group's flagship service *The Palm Beach Letter*, small-cap and cryptocurrency newsletter *Palm Beach Confidential*, *Palm Beach Crypto Income*, options advisory *Alpha Edge*, *Palm Beach Pioneer*, and *Palm Beach Crypto Trader*.

A former hedge fund manager and Wall Street executive, Teeka became the youngest vice president in the history of Shearson Lehman at 20. In 1998, he made a small fortune going short during the Asian crisis. But then, he "got greedy" (in his own words) and hung on for too long. Within a three-week span, he lost all he had made – and everything else he owned. He was ultimately compelled to file personal bankruptcy.

Two years after losing everything, Teeka rebuilt his wealth in the markets and went on to launch a successful hedge fund. After these events, he developed a newfound appreciation for risk. He made risk management his No. 1 priority.

Today, Teeka's personal mission is to help teach individual investors how to grow their money safely through asymmetrical investments. This is his strategy for making life-changing profits without putting your current lifestyle at risk.

TEEKA TIWARI'S PUBLICATIONS

PALM BEACH DAILY

Teeka Tiwari's Palm Beach Daily includes a team of analysts, traders, former hedge fund managers, entrepreneurs, and real estate developers. At the *Daily*, we share viewpoints you won't find in mainstream media, from alternative currencies to off-grid assets. Every day, we give you techniques to help improve your financial situation and life.

THE PALM BEACH LETTER

The Palm Beach Letter is an investment advisory and retirement newsletter that focuses on generating income both on and off Wall Street, investing in low-risk assets using an expansive asset allocation model, securing and protecting wealth, and living a rich and healthy life.

TEEKA TIWARI'S ALPHA EDGE

Investing pros often talk about "Seeking Alpha." That means choosing investments they hope will beat the averages. That's what this service is all about: trying to give you the *Alpha Edge*. Teeka will share the strategies he used to reserve for the high-net-worth clients when he was a hedge fund manager. These are some of the smartest, safest, and most profitable investments in the world.

TEEKA TIWARI

As one of the first investing experts to explore cryptocurrencies, Teeka Tiwari is a financial pioneer. He recommended bitcoin and ether in 2016 when they were trading around \$400 and \$9, respectively. And that was just the start...

He's since recommended nearly 100 cryptos, helping thousands of readers turn tiny grubstakes into veritable fortunes. That's not just hyperbole...

Many of Teeka's subscribers have even seen their crypto portfolios explode from as little as a few hundred dollars to over a million.

That's why he gets messages every day, like this one... "Thank you again for all that you do. Without Teeka, we might never have been so blessed with life-changing gains. Thank you, Teeka, for changing our lives!"

It's all part of Teeka's two-pronged mission:

1. Help readers make money safely so they can lead a comfortable, dignified retirement.
2. Help make readers more financially literate so they can make better investment decisions and lead better lives.

TEEKA TIWARI'S PUBLICATIONS

PALM BEACH CONFIDENTIAL

Palm Beach Confidential is our small-cap and cryptocurrency service. Most of the companies and cryptos we recommended in this service have market caps of less than \$1 billion. Teeka is widely considered as one of the premier crypto analysts in the world. In this advisory, Teeka uses a strategy called "asymmetric investing," which allows you to turn small sums of money into life-changing gains. Teeka has used this strategy to create one of the best cryptocurrency portfolios in the world.

PALM BEACH CRYPTO INCOME

In the stock market, there are two main ways to make money: capital gains and income from dividends. These two are completely different ways to invest. And each requires a separate strategy. The same idea applies to the cryptocurrency market. This unique service doesn't only look for cryptocurrencies that appreciate in price... but also pay incredible dividends – so you can make income no matter what the market is doing.

PALM BEACH PIONEER

Web3 is the next evolution of the internet. And the beauty of it is that you can own a piece of the protocols that will exchange trillions of dollars worth of value. In *Palm Beach Pioneer*, we find projects that are the building blocks of Web3 and give you the potential to at least 10x your money.

PALM BEACH CRYPTO TRADER

In this service, editor Teeka Tiwari uses his proprietary CONAN system to find crypto trades that could potentially make massive gains in 60 days or less. CONAN is an AI-based neural network designed to analyze thousands of data inputs from the crypto market. Then, it "crunches" all of that data to predict which assets it expects to move higher in the days and weeks ahead. That means we can expect the big moves in the underlying asset within 60 days of receiving the signal.

MORE FROM OUR PARTNERS

 **JEFF CLARK TRADER**

 **THE
OPPORTUNISTIC
TRADER**

JEFF CLARK

Jeff Clark is the editor of several investment advisories which focus on profiting from options in any market environment.

Jeff began writing newsletters after retiring from his independent, San Francisco-based brokerage house and private money management firm at age 42. Before that, Jeff developed the curricula for an international MBA program and founded an investor education firm.

Now, Jeff takes the same strategy he used for his clients – around 100 of California’s wealthiest individuals – and exclusively shares these techniques with his loyal subscribers.

Jeff’s strategy allows you to potentially make money no matter what a stock does – whether it goes up, down, or just stays the same. That’s what makes him one of the best traders around. And his track record can attest.

Since 2005, subscribers have had the opportunity to make triple-digit gains over 50 times and double-digit gains more than 160 times. He continues that success with his suite of services for new and experienced traders.

JEFF CLARK’S PUBLICATIONS

JEFF CLARK’S MARKET MINUTE

In Jeff’s free e-letter, he provides timely market commentary and actionable trading ideas two hours before market open. The strategies and commentary are both conservative and speculative, designed to help readers take advantage of short-and sometimes intermediate-term market moves.

JEFF CLARK TRADER

Jeff’s flagship advisory, where he shows traders how to fund a comfortable retirement trading just three stocks. As his introductory options service, he offers option trading fundamentals and lower-risk trades to teach investors the power of using options to amplify their returns.

JEFF CLARK’S DELTA REPORT

Here, Jeff builds on the trading foundations laid in *Jeff Clark Trader*, providing readers more speculative and advanced option trading opportunities with more frequency, and higher return potential. This service also includes special reports like *The Crisis Trading Blueprint* and *Spotting the Perfect Trade*.

THE FOREVER PORTFOLIO

The Forever Portfolio is Jeff’s long-term answer to a turbulent market. It’s a “set and forget” portfolio of a dozen stocks that can provide great returns over the long run... By taking advantage of stocks that have historically been “recession-proof.” You’ll have two ways to enter positions: buying the stocks outright, or his “no money down” options strategy.

IMRE GAMS' PUBLICATIONS

△ CURRENCY TRADER

Currency Trader looks to generate outsized returns by tracking the currency exchange rate fluctuations that take place 24 hours, 5 days a week. You can expect regular trade recommendations with detailed entry and exit instructions. The primary advantage of trading FX is that this asset class is uncorrelated with the broader stock market. That means it will greatly outperform the stock market during bearish cycles, while still providing outsized returns when markets are more stable. Technical analysis is the primary basis for this strategy, with a special emphasis on Elliott Wave cycles.

IMRE GAMS

Imre Gams is a 14-year trading veteran. He started his trading career managing his own money. After quickly building a strong track record, he was hired at one of the country's leading proprietary trading firms. Imre became one of the firm's performance coaches and began training other professional and aspiring professional traders.

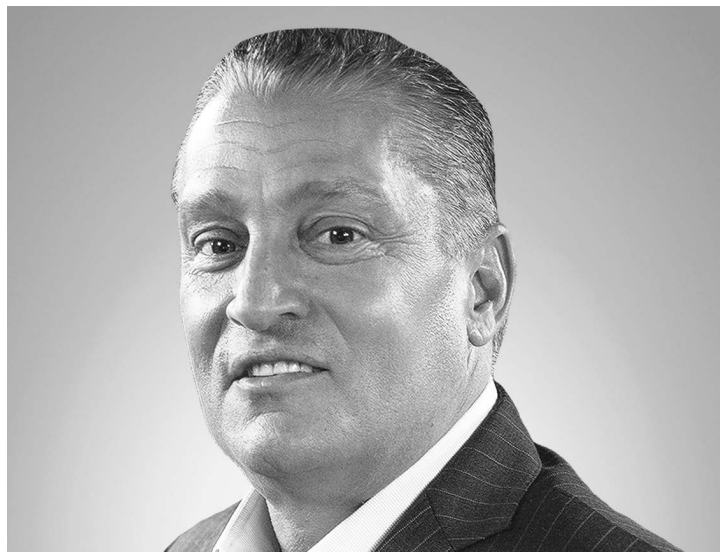

To date, he's worked with over 3,000 traders in one-on-one and group settings. Imre's also managed substantial investment portfolios in the millions of dollars.

Within the trading world, Imre is known for his specialized expertise in technical analysis. He has given lectures and talks around the world to traders looking to sharpen their chart-reading skills.

He is now bringing his experience to Jeff Clark's subscribers. In *Currency Trader*, Imre will make trade recommendations on the forex marketplace, the largest trading market in the world.

Imre's trading strategy focuses on identifying short and intermediate-term movements in currencies such as the U.S. dollar, the euro, and the Japanese yen.

Imre currently resides in Toronto, Canada.

LARRY BENEDICT

Larry Benedict, a graduate of Syracuse University, has over 35 years of experience as an investment professional.

In 1984, he began his career as a market maker in equity derivatives products on the floor of the Chicago Board of Options Exchange.

Later, Benedict worked as a market maker on the American Stock Exchange and, in 1989, was hired by Spear Leeds & Kellogg (SLK) as its options specialist in the XMI Major Market Index on the American Stock Exchange.

After the Goldman Sachs purchase of SLK in 2000, Benedict launched Banyan Equity Management, LLC.

The Opportunistic Trader is the culmination of Larry Benedict's 35-year trading career.

Using simple, easy-to-understand trading plays, Larry helps everyday investors benefit from the secrets that made him a multimillionaire.

It's the best way we know of for regular people to access hedge fund-level strategies and consistently market-beating returns. And it's the day trader's most essential resource during volatile times.

LARRY BENEDICT'S PUBLICATIONS

ONE TICKER TRADER

New traders can go astray trying to follow every new trend in the market. A far better way is digging deep into one single idea at a time. *One Ticker Trader* is an introductory options trading service that chooses a single stock or theme to focus on each month.

The Opportunistic Trader is Larry Benedict's quintessential options trading service. Each week, traders can expect recommendations for call and put options based on the latest market trends, as well as regular market and portfolio updates.

THE S&P TRADER

The S&P Trader is an options trading service focused on just one ticker, SPX. By using a vertical spread strategy, traders limit their risk and increase their odds of success. This is an active service with many opportunities each week, as well as regular market and portfolio updates.

»THE 2/20 REPORT

Larry Benedict is an expert trader who knows ways to make money that most people never hear about. In *The 2/20 Report*, he shares these lesser-known opportunities... But unlike with hedge funds, which typically charge a 2% management fee and 20% performance fee, subscribers keep all their profits from this service.

CURRENCY WIZARD

Over his career, Larry has traded more than \$500 billion worth of currencies. Now he is introducing this unique market to retail traders. In this advisory, he identifies meaningful movements in the currency markets and shares the best, lowest-risk ways to play these moves.
